PROFESSIONAL EXPERIENCE

FRONTEND DEVELOPER

DV8 Offroad   *Remote*   *2020-2021*

- Implemented and customized a Shopify theme and plugins using JavaScript, HTML, and CSS, which improved the UI/UX and conversion rate for our customers.
- Monthly revenue increased 200% in the following months after project completion.

FULL STACK DEVELOPER

Addictive Desert Designs   *Mesa, AZ*   *2014-2020*

- Designed and developed a modern responsive and mobile friendly design using HTML/CSS and JavaScript/jQuery to our existing e-commerce platform
- Worked with the sales and marketing team on various solutions that grew revenue steadily with a 100% growth YoY.
- Made SEO improvements through frontend and backend changes using PHP, MySQL, HTML/CSS
- Integrated APIs from Google, Facebook, and YouTube for new website features
- Implemented the Affirm payment option into our existing e-commerce platform.

SOFTWARE ENGINEER

Finding King   *Mesa, AZ*   *2013-2014*

- Developed an internal tool with C# using UPS's API to calculate delivery times and status of customer products.
- Automated the process of uploading product images to eBay listings using eBay's API.
- Prototyped an ASP.NET web application that allowed drop-ship vendors to generate USPS labels.

FREELANCE DEVELOPER

Self-Employed   *Remote*   *2010-2018*

- Built small business e-commerce websites using WordPress with Woocommerce for several clients.
- Prototyped a functional integration of a 3rd party REST API into a WordPress website to allow the client to purchase concert tickets. labels.

INFORMATION TECHNOLOGY SUPPORT

City of Tempe, IT Department 📍 *Tempe, AZ* 📅 *2010-2012*

- Worked on several city projects using Esri's geographic information systems tool, ArcMap, for the Fire Department and Public Works Department.

ENTREPRENEURSHIP

GAMESTASH

gamestash.app

Built a free to use video game cataloging service using a PEVN (Postgres, Express, Vue.js, Node.js) stack. Utilizes Twitch.tv's IGDB (Internet Games Database) API to pull video game meta data for cataloging. Users can create accounts to keep track of their personal video game collection.

CVBERPUNK

cvberpunk.com

Started a small e-commerce business from the ground up selling custom designed clothing to a niche market. Fully designed and developed a custom Wordpress website using JavaScript, HTML, CSS, and PHP. Maintained on a cloud web server and database through DigitalOcean. Built a social media following with over 10,000 followers on Instagram

PROJECTS

MEDIA CATALOG

media-catalog.netlify.app
github.com/steppjason/media-catalog

A personal movie cataloging web app built with React.js and Firebase.

ITCH.IO

jasonstepp.itch.io

A collection of small hobby games made with Unity for various game development jams.

EDUCATION

B.S., COMPUTER INFORMATION SYSTEMS

Arizona State University 📍 *Tempe, AZ* 📅 *2012*
